

Nouskun Brand Labs

Crafting Digital Excellence

Project Proposal & Maintenance Agreement

Client Project: Dimple_FD Portfolio Website

Date: May 1, 2026

1. Project Overview & Work Completed

Nouskun Brand Labs has designed and developed a state-of-the-art, interactive portfolio web application for **Dimple_FD**. The core objective was to create a highly performant, visually stunning digital experience.

Key Developments & Optimizations:

- Core Architecture:** Built a modern, fully responsive web application utilizing React, Vite, and modern JavaScript (ES6+).
- Interactive UI & Animations:** Developed sophisticated custom animations and page transitions using GSAP and Framer Motion, resulting in a premium look and feel.
- Scroll Performance:** Implemented smooth scrolling with Lenis, heavily optimizing the experience by using hardware-accelerated transforms and eliminating scroll lag.
- Visual Design:** Applied modern styling with Tailwind CSS, including custom dynamic gradient backgrounds, responsive masonry grids, and optimized typography.
- Asset Optimization:** Integrated lazy loading for high-resolution images to drastically improve initial load times and overall performance metrics.
- Deployment & CI/CD:** Configured and established automated deployment pipelines using Vercel, ensuring high availability and seamless future updates.

2. Technical Statistics

Our engineering efforts have yielded a robust, scalable codebase structured for long-term maintainability:

- Total Files:** 49 structured source files
- Total Lines of Code:** 6,453 lines of custom code
- Technology Stack:** React 19, Vite, Tailwind CSS 4, GSAP, Framer Motion, Lenis (Smooth Scroll)

3. Financial Summary

Description	Cost
Project Development Quotation	₹40,000 INR
Domain Registration	₹1,060 INR
Monthly Maintenance Package*	₹1,688 INR / month

**The Monthly Maintenance Package includes comprehensive Asset Management, Global CDN hosting for high-speed delivery, and dedicated Server hosting.*
